CREATING SAFER
WORKPLACES

Focus+ Workplace

Fast cost efficient workplace drug detection programme for New Zealand's manufacturing industry

At ScentTECH, we understand the growing need for workplaces to remain drug-free—both for safety and productivity. But we also know that traditional drug testing can be expensive, invasive, and often inefficient.

That's why we offer a smarter, safer way to ensure a drug-free workplace.

Focus^{+} is an integrated drug detection strategy combining the unmatched accuracy of specialist detection dogs with the targeted onsite saliva testing. It provides fast, defensible, and cost-effective drug-risk management at scale.

The ScentTECH ***Focus***$^{+}$ Process

Step 1: Canine Drug Screening

- Our professionally trained detection dogs conduct a fast and discreet sweep of your workplace.
- They screen all persons on the worksite and will identify individuals who may be in possession of, or under the influence of, illicit substances.
- They will locate any drugs hidden on the premises (yard, vehicles, common rooms, washrooms and lockers).

Step 2: Targeted Saliva Testing

- Only those individuals flagged by our canines undergo a saliva-based drug test—resulting in up to 90% fewer tests.
- Saliva testing complies with AS/NZS 4760:2019 standard and your workplace policy.

Step 3: Lab Based Confirmation

- Confirmation testing is performed as per the company policy.

Step 4: Action & follow-up

- Comprehensive reports support HR/safety decisions, incident investigations, medical referrals or rehabilitation planning. Rollout plans can include scheduled deterrent sweeps or incident-driven deployments.

"Proactive drug detection for safer work places"

We have been using Wayne and the team from Scenttech to carry out random drug detection of our crew members for some years. Initially we were disappointed as we had a number of positive drug test, however overtime this has improved a lot, and we now have a better group of guys who are easier to manage. This has proven to be a positive for our business.

I had Scenttech Ltd. come and perform drug searches on personnel as well as saliva drug testing … for the record, he and the dogs were amazing. I would recommend you getting him to your site today.
